Dmc secret mission 4 guide

Edit Share Fight against the shadow. You only have one chance. After defeating the lion in Mission 04, return to the workshop with the biplane and use the dial to activate the lift. Get on the elevator to take you to the secret mission. This mission tasks Dante with defeating three shadows at once in the arena area for a Blue Orb Fragment. This is probably the most difficult task in the game so far. Shadows are quite docile if not attacked (indeed, if Dante stands perfectly still they will often just circle around him, do nothing), so it is best to focus on taking the creatures at a time while listening to the sound signals of any attacks the others might be carrying out. The ideal tactic is to go for critical hits: these can be performed by waiting for the Shadow's Skewer attack, then jumping on the spear while it's being extended and firing Devil Trigger Ebony & Ivory shots at the Shadow. Success will result in hits that damage directly to the core of the Shadow, which can kill in a single volley at most difficulties. Shadows always drop health when they are defeated, usually enough to fully top up Dante's health. If the player expands this secret mission to New Game+, Nightmare β is ideal here because it can bring Shadows into their fragile core state very quickly. If the Shadows defeat Dante, after using a Yellow Globe Dante is returned to the workshop and the dial on the wall can no longer be activated: this is what the mission description means by having one chance. The only way to try again is to reset the mission and restart it. Save before you reset the mission as failed, and makes it inaccessible to New Game+ if the player doesn't have a previously saved file to return to. Secret Mission 04Where to find it: Mission 05 - The Devil Sword Sparda Character: V When you reach the warehouse, you come across a jetty after some time, which clearly blocks the passage. You then have to summon the Nightmare so that, as in the previous mission, it can reveal the secret passage. You will then have to encounter a group of enemies. After the battle, climb the stairs to the top and start the secret mission 04. In this secret mission, you must defeat your enemies, not let yourself be hit once. Fortunately, V is a character who can stay away from enemies and call on allies to fight for her. The key to success includes the Nightmare, which is fast with the most Handles. But be careful, however, don't teleport too quickly to enemies and eliminate them, as you may be hit during the murder trial. The price is a fragment of the blue sphere.
